1. Glossary

- 1.1. BK - Beekeeper
- 1.2. Batch BK - Each batch can be associated with multiple BKs. Each BK can be associated with multiple batches. Batch BK is a connection between a particular batch and a particular BK.

2. Technology & 3rd-party API

2.1. Front-end

2.1.1. React

2.1.2. Google Maps API

2.1.3. Google Analytics API

2.2. Back-end / Admin: Django (Python)

2.3. DB: PostgreSQL

2.4. Server: Heroku

2.5. Logging: ?

2.6. CI/CD & Testing: Circle CI

3. Design Files

Icons: https://drive.google.com/drive/folders/1s9C2IWH3S50cCP_wKmBE_2faMbFQA_F?usp=sharing

Upendo Honey logo:

<https://drive.google.com/file/d/1uXPczjoHw-McJsm5aDUSp-wPKsf97aDP/view?usp=sharing>

Bullet Points:

- BK
- Forest
- Honey
- CO2

4. User Flows

Prioritized Tasks (Approved by the Partner):

1. Redesign the beekeeper flow
2. Forest Flow
3. Forest Flow (google maps API)
4. Honey Flow
5. CO2 Flow
6. Google analytics
7. Tooltips for desktop and pop-ups for mobile
8. Customize the order of the pages

Navigation between screens:

- **Mobile:** swiping left/right
- **Desktop:** buttons back/forward
- Users are allowed to go back to previous screens

Extra functionality:

- Progress bar
For D2 the progress bar will be hardcoded on Desktop

Design Notes:

- Font
 - For headings use: Bree Serif
 - For normal text use: Nunito
 - For the letter translation use: Indie flower

SEO:

- Google Analytics to be added in D3
- App does NOT need to be available on google search and configurable for SEO

Social Media:

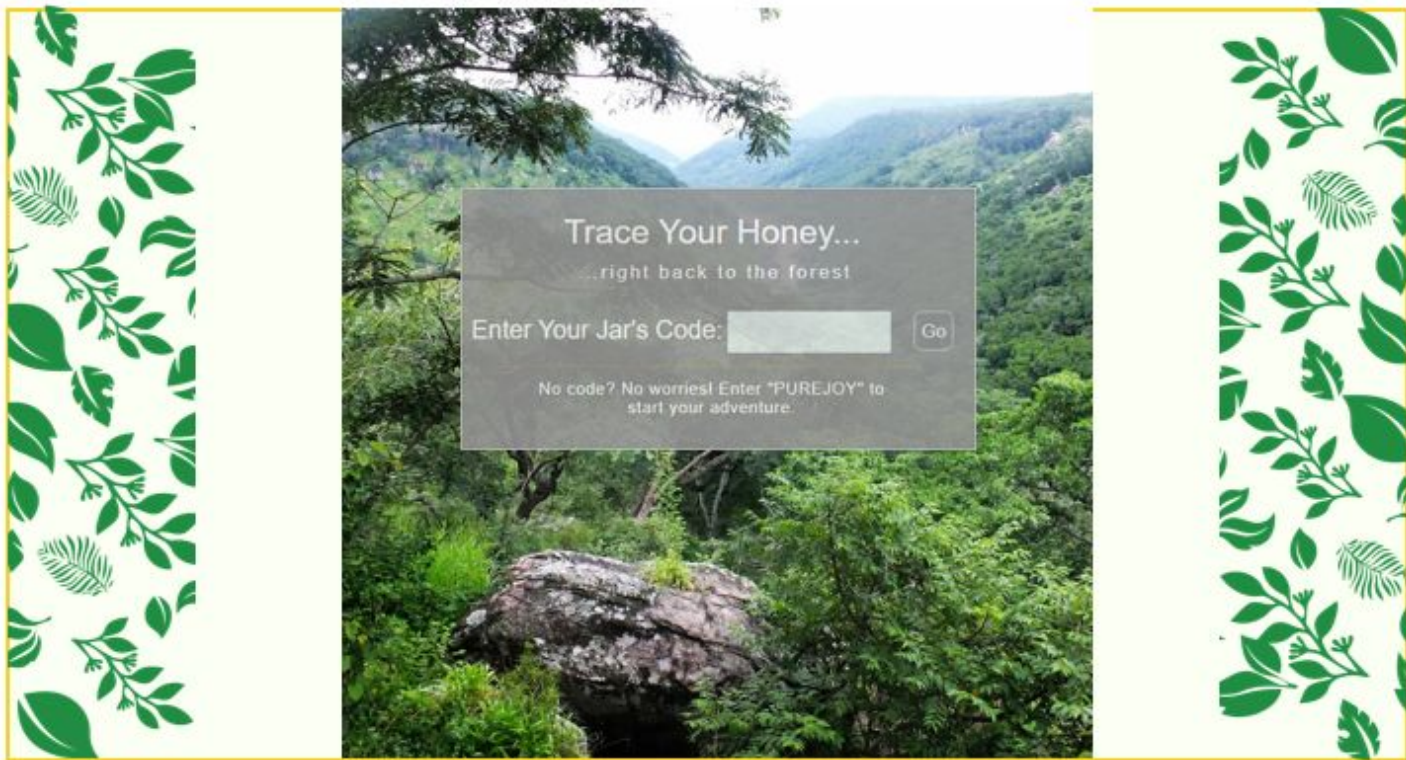

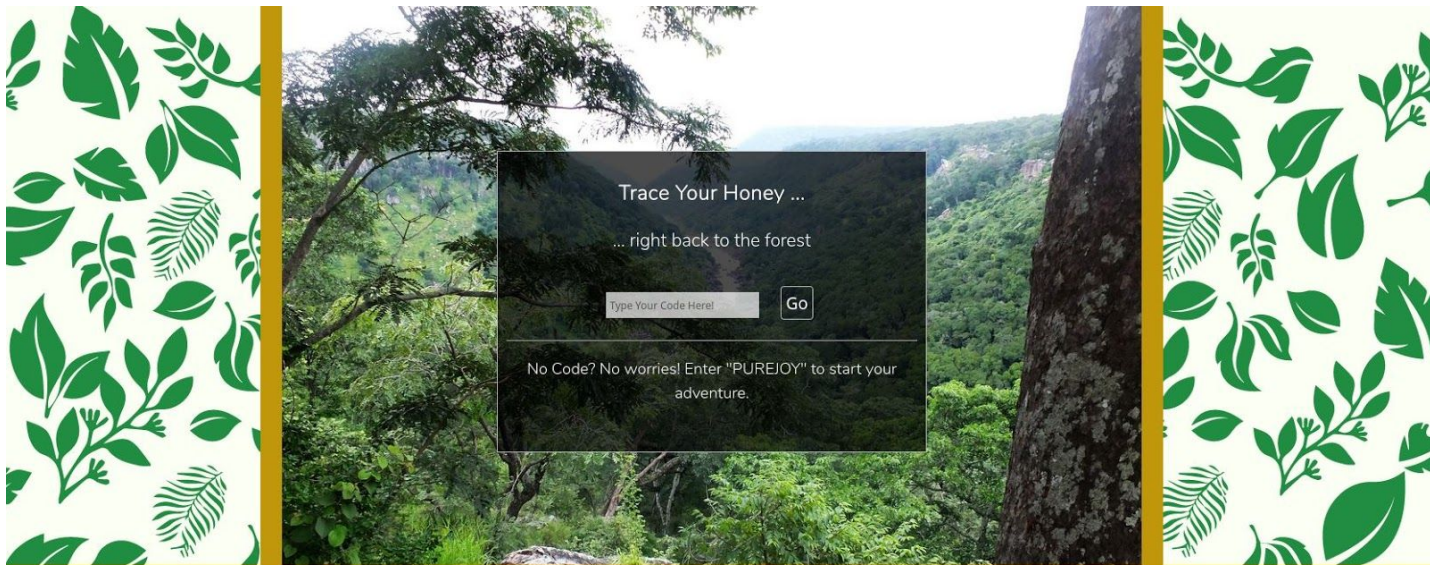

- There will be NO social media buttons in the app

4.1. Call-to-Action Screen + Navigation Screen

Screen	Functionality	TODO	Mockup
Call-to-Action	<p>A user can input an alphanumeric code to be redirected to the navigation screen.</p> <p>Alphanumeric code is per a Batch BK.</p> <p>Alphanumeric code is always capitalized (user should be able to input it as lower case or uppercase)</p>	<p>MOBILE + DESKTOP:</p> <ul style="list-style-type: none"> - Add a test/example code (like at the existing app PUREJOY) - Add a forest background photo https://drive.google.com/file/d/1RuwgEqRZAJ_iWbczsFmKYo5ibOfYjhqA/view?usp=sharing - Mockup is just the current - will be changed in next version. 	
Navigation	<p>User is redirected to this screen from either the Call-to-Action screen or by scanning a QR code.</p> <p>4 icons are clickable and redirect a user to 4 flows:</p> <ul style="list-style-type: none"> • BK • Honey • Forest • CO2 	<p>MOBILE + DESKTOP:</p> <ul style="list-style-type: none"> - Partner to provide icons by June 30th. D2 will be built with placeholder icons. - Update placeholder icons with real icons in D3. - Change title to "Click below to discover more..." - Add Upendo icon with a url (both icon and url to be configurable in admin per Batch Member) - There will be 5 icons overall <p>MOBILE:</p> <ul style="list-style-type: none"> - Add tooltips/popups 	

		<p>for icons</p> <p>DESKTOP:</p> <ul style="list-style-type: none"> - Add text near each icon <p>ICONS / TOOLTIPS TEXT:</p> <ul style="list-style-type: none"> • Meet your Beekeeper • Honey and climate change • Show me the honey! • Go to the Tanzanian forest • Or visit our website...

---------------------	---	--	---

Your new favourite honey!

Ah yes, Dark Amber Honey. An excellent choice.

The dark amber variety has an earthy, rich caramel flavour. As dark as the African night this honeydew honey is produced from flowers in the short rainy season from October to December

Need some sweet ideas? Click on the recipe book for inspiration...

Raw, organic, wild honey

Wild bees move with the flowering season of the forest; governed by the natural rhythms of rain, fire and rejuvenation.

This honey is wild harvested from native forests in the heart of Africa; not farmed from bees kept in hives year on year.

The honey is certified organic and as raw as nature intended.

Heavenly Healthy Honey

Honey has been used for 1000s of years as an important medicine.

High in antioxidants

Disinfects and heals wounds

Soothes a sore throat

Antibacterial and antifungal

A potent probiotic

With certified organic honey you can be sure it is free of all pesticides and insecticides. We also never heat or pasteurize the honey which destroys valuable protein chains.

4.5. CO2 Flow

- Hardcoded Content (no admin editing functionality for this flow)

Screen	Functionality	Mockup	Content Example
		 <p>Forest Honey and Climate Change</p> <p>Our honey is carbon negative. By keeping native tropical forests healthy, CO₂ is removed from the atmosphere. Buying honey from these forests mean they will not be cleared for agriculture or firewood.</p> <p>Here we compare the emissions related to our organic forest honey with those of a locally sourced jar of honey that hasn't come from a tropical forest.</p>	<p>Text:</p> <p>Our honey is carbon negative.
